

SCANDINAVIAN MARKET PREPARATION

Complianza has developed a packaged fixed price service for iGaming companies who want to be prepared for the de-regulated Scandinavian market and in particular the Swedish market but in some extent also the Norwegian market.

IN A NUTSHELL

Complianza will make sure that you are as prepared as possible for the upcoming changes of the Swedish gaming market and yet only spend a fixed fee with a minimum impact on your organization so you can focus on your revenues. The effort will start with a workshop, followed by an assessment of your product and organization and then presentation of a comprehensive report.

Don't wait until it is too late; do as other operators and suppliers get prepared for the de-regulated Scandinavian Market!

The work and report produced by Complianza helped us understand what is happening and what to expect on the Swedish gaming market. It has also been a valuable input to develop our organisation in order to be able to manage very large accounts

PROJECT PLAN

The project will last for roughly 4-6 calendar weeks with 1 or 2 resources from Complianza. Of course we cannot do this by ourselves; it is essential that you also are committed to the effort. Together we will come to the conclusion on what you must focus on. The first step is a workshop where Complianza will present what we will do and what exactly we require from the organization. The workshop and the start of the assessment will be held at your premises roughly 1-2 weeks after order, depending on availability of the parties. Then subject to availability of required resources the report will ready in a first version 3-4 weeks later where it will be presented and where you will be able to provide comments and raise questions.

RESOURCES

Complianza has an extensive knowledge from regulated markets and its requirements. And with experience from the state lotteries and regulatory bodies in Sweden, Norway and Denmark we can boldly say that we will prepare you for the new regulated markets. During the last years the consultants have been working with Norwegian and Swedish state lotteries and their procurement of systems as well as supported a large game supplier entering several markets, e.g. Denmark and Spain, and investigated opportunities for other markets.

REPORT

“The report will have the following table of Content

CH	Heading	CH	Heading
1	Document Information	4	SvS
2	Introduction		General
3	Swedish Gaming Market		Integration
	Background		Quality and Environment
	Stakeholders		SvS Future
	Market Size	5	Your Company
	Directive new regulation in Sweden/Norway		Available Processes
	Time Plan		Product
	License Market		Gap Analysis
	Type of market	6	Action list
	Possible challenging requirements		

CONCLUSION

When the report is produced Complianza will be available for a presentation of the result where additional and more detailed information can be provided. The fixed fee ranges from 15 KEURO to 25 KEURO depending on scope and complexity and includes 2 meetings at your premises in Europe over totally max 4 nights.
