Summary

rMony by Complianza is a Software-as-a-Service (SaaS) solution that helps organisations in the highly regulated gambling industry simplify and reduce the cost of managing all certificates for all markets and fulfilling regulatory requirements.

Streamline all compliance activities by centrally implementing all certifications, monitoring all market regulations and reporting on specific compliance initiatives within one safe and convenient application.

A fully automated compliance system, removing the headache of keeping on top of compliance regulations in each market: improving execution, quality, communication, work flow and access.

Safe & Convenient Application

- | Safely store all gambling regulatory certifications
- | Compiled in one application with easy access
- | Quickly locate & retrieve certificates for specific suppliers or jurisdictions

Fully Automated System

- | Automatically distribute certificates to all operators & partners
- | Automated reminders when certificates are about to expire
- | Automated reminders for providing reports & documentation to regulators

Decrease Regulatory Workload

- | No need to manually handle certifications
- | No need for homemade systems that require development resources
- | rMony will always remember any deadlines for suppliers or regulators

Certificate Management

Uncomplicated with Increased Quality

Suppliers

- | Upload Certificate
- | Add Meta-data
- | Publish Certificate to Operators

Operators

- | Choose from Preloaded Certificate Library
- | Receive Updated Certificates
- | Remain Compliant

| Your Challenge

Gambling markets around the world are constantly changing, and for businesses in the highly regulated gambling industry compliance is a huge headache.

Complying with various laws, standards, frameworks and regulations is a complicated, expensive and time consuming process.

Providing legal & technical assessments, internal & external audits, and certificate management for each market costs you money and resources that could be used to develop your business instead.

- | Managing all gambling certificates with changing regulations across multiple markets
- | Defining responsibility and enforcing accountability within the compliance program
- | Providing accurate, timely and impactful reports & documentation
- | Analysing potential new market regulations & compatibility

Our Solution

Complianza's rMony Compliance Management Solution centralises your compliance management activities, with a simple, easy to use Software-as-a-Service (SaaS) solution. rMony streamlines all compliance activities by centrally implementing all certifications and monitoring all market regulations with easy to use reporting on any specific regulation initiatives.

Easily set up your compliance programme using preloaded supplier certification libraries for all associated games, and receive the latest certificates from suppliers, remaining fully up to date with the gambling regulations in all your markets.

Compliance officers can quickly locate and retrieve certificates for specific suppliers or jurisdictions, allowing easy reporting & documentation.

Consolidate your
entire Compliance
System

Remain on top of all certificates with automated notifications on certificate expiry deadlines and changes in market regulations, helping you avoid fines and meet the most demanding market compliance requirements.

Define compliance to each market regulation easily with specific regulation notes, compiled alongside the market regulations for easy management and reporting. Changes in regulations are automatically updated and flagged, allowing constant compliance in all markets.

Stay On-Top of Market Regulations

Easily define your compliance within each market with specific regulation notes, allowing a full overview with easy reporting and handover.

New Market Oversight

Manage your market regulations and gambling certificates while identifying overlapping regulations and any gaps or deficiencies in certification in new potential markets, allowing you to branch out into new markets quickly and efficiently.

Fully Open API

Open API enables retrieval of information for your own reports & metrics, allowing full integration into your current systems.

Safe & Convenient Application

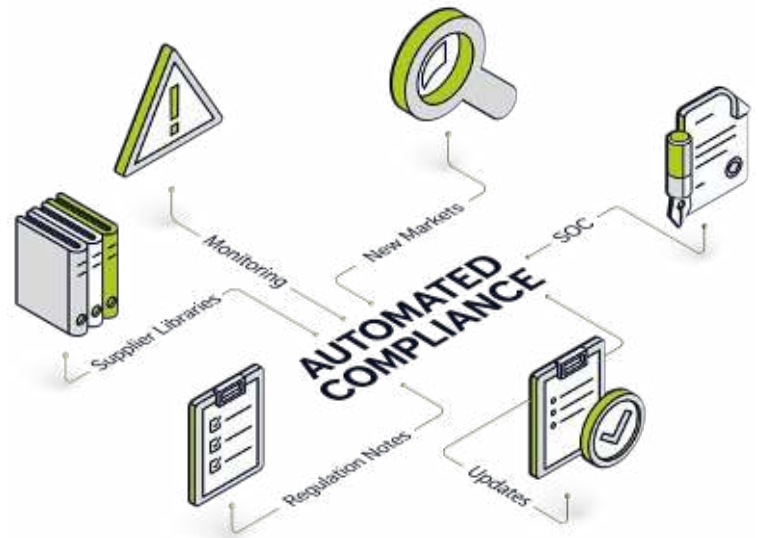

Safely store all your regulatory certificates and compliance notes all in one secure and easy to use application. Quickly locate & retrieve certificates for specific suppliers or jurisdictions, and analyse how you comply to specific market regulations.

Automate

rMony's Automated Compliance Management Solution empowers you to fully automate & streamline compliance processes:

- Easily set up your compliance programme using preloaded supplier certification libraries
 - Receive the latest certificates from suppliers, remaining fully up to date with all gambling regulations
 - Automated metrics to continuously monitor compliance
 - Gain greater visibility of your overall compliance program and identify overlaps, deficiencies, and gaps in different Markets
 - Receive updated market regulations, highlighting any gaps within new regulations
 - Easily create a Statement of Compliance (SOC) based on your defined Statement of Applicability (SOA)
- Suppliers
- Operators

Our automated system removes opportunity for human error, flags issues with new regulations and missing or outdated certificates, while granting confidence that requirements and any deadlines for suppliers or regulators will be met.

There is no need to manually handle certifications or use in house systems that require development resources, substantially decreasing regulatory workload and allowing all employees to focus on growing the business instead.

Who We Are

Complianza provides unparalleled senior consulting services and products to the gambling industry. We know gambling and believe in the importance of compliance.

Compliance for us goes from making correct decisions in market management, e.g. procurement or market entry, fulfil legal gambling regulations as well as complying with standards, expectations, and developing procedures and processes.

We deliver expertise and efficient solutions to our customers to achieve results of the highest quality.

With many years' experience in online gambling and VLT gambling working with Scandinavian regulators and lotteries we are the right partner for any dynamic gambling organisation.
